New Product

This is a second CD of organ music performed by James Cook on the organ in the First Church of Christ, Scientist, Edinburgh. The title draws inspiration from the words of the architect Mies van der Rohe who had a vision that artistic work could be produced with minimal resources. Although the Edinburgh organ has only 8 stops the CD demonstrates that, because of the instrument's quality, integrity and disciplined design, it is capable of handling a wide range of music.

1	G. Bohm	Partita on "Ach wie nichtig, ach wie flüchtig"	9:40
2	J. G. Walther	Prelude on "Liebster Jesu, wir sind hehr"	1:15
3	J. S. Bach	Prelude on "Liebster Jesu, wir sind hehr"	2:40
4	J. B. J. M. Reger	Prelude on "Liebster Jesu, wir sind hehr"	1:35
5	N. Rawsthorne	Aria in F major	2:32
6	D. Buxtehude	Passacaglia	5:20
7	M. Archer	Prière	4:12
8	J. Cook	Variations on "Ruth"	2:24
9	J. Fachelbel	Fugue in d minor	2:15
10	G. F. Handel	Pastiche on "See the Conquering Hero Comes"	4:12
11	A. Ketèlbey	Bells across the Meadows	3:53
12	J. Battishill	Voluntary in B flat major	1:48
13	F. Mendelssohn	Andante from trio, arranged E. Thiman	2:42
14	Traditional	Flow Gently Sweet Afton	2:45
15	A. Hollins	Prelude in F major	2:45
16	D. Bédard	Variations on "Sine Nominee"	4:05

The 16 tracks on the CD include music by Bach, Handel, and Mendelssohn, as well as contemporary composers Malcolm Archer and Denis Bédard. Several of the tracks focus on interpretations of hymns from the Christian Science Hymnal - 85 "God of Truth, eternal good" (tune: Liebster Jesu), and 66 "From these Thy children gathered in Thy name" (tune: Sine Nominee).

Physics Metaphysics and GOD

by Jack W. Geis

Throughout Part 1 of the book the author quotes from notables such as Eugene Wigner, John Wheeler, Deepak Chopra, Larry Dossey, Fred Wolf, Amit Goswami and Edward R. Close on the subject of basic quantum physics and philosophy. In varying degrees each believes that observation of quantum phenomena and resultant interpretations involve consciousness. That is, consciousness plays a significant, if not primary role in interpreting or even shaping reality, God.

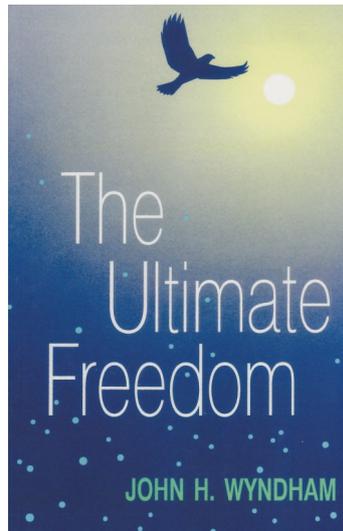

Each ascribes to consciousness a mental nature, but not necessarily a wholly spiritual nature independent of matter, space-time. Here is where the author and the above-mentioned begin to "part company." The author believes that beyond the quantum and quantum phenomena lies the realm of Spirit

In Part II the author discusses the phenomena of spiritual healing, or healing by prayer. No other book on the market brings in the works of Christ Jesus in a book that discusses both physics and metaphysics in the way the author does. The author presents documented healings occurring in the present age through prayer to substantiate his claim for the presence of God (Mind) and the spiritual nature of man and the universe.

The Ultimate Freedom

by John H Windham

This true, spiritual adventure story begins when the author is captured on the island of Java during the Second World War. The way he finds his freedom during his three years of captivity makes for inspiring reading. After the war the author takes the reader on further spiritual adventures to do with employment, income, economic freedom, and his work with the United Nations. The author later lectured worldwide, in four languages, on the subject of spiritual healing.

"We have pleasure in announcing that the CD "Lift Up Thine Eyes" has been professionally re-mastered due to some glitches in the previous one. It has new photographs and is cellophane wrapped.

Lorna Kelly (soprano) recorded these solos in her home country of Zimbabwe where she was a member of First Church of Christ, Scientist, Harare and soloist there for many years. She has now relocated to The Lake District and is a member of the Windermere branch and a guest soloist/organist at the Kendal Church."

The gripping and inspiring story of a 100-year old news organisation for which overcoming the odds for survival was only the beginning. Absolutely required reading for everyone who loves The Christian Science Monitor. This wonderful book by Keith S. Collins, a more than 20 year veteran and contributor to the Monitor, is now available. A “one sitting read” by Bruce and he loved it.

This moving narrative tells of the American school teacher who introduced Christian Science to several prominent Japanese families. The history follows the early days of Christian Science in Japan, through the hardships of the war years and beyond.

Frances Thurber Seal boarded a trans-Atlantic steamer for Europe to share Christian Science in Germany. Although she did not speak German, her healing work quickly stirred interest. This inspiring, first-person account is a perennial favourite.

Cracking The Camouflage Ceiling

by Chaplain (Colonel) Janet Yarlott Horton

Janet Horton was one of the first women chaplains in the US military. Men in the armed forces were not easily accepting women in the days of challenge and change in the 1970s. Some officers and enlisted men, even among the chaplaincy, refused to respect women chaplains. Both officers and men sometimes mocked, demeaned and threatened Horton in her work of comforting army personnel, uplifting morale and conducting Christian religious services.

Being in the small Christian Science denomination did not help things for this woman, who, unusually for a woman, prevailed and achieved the rank of colonel. This really is the story of how deep faith in the promises of the Gospel and the idea of unselfish service, patience, and smart and capable performance changed minds and hearts of many in the military. Pioneers often have to run races and climb hurdles; this is that story told in a winning and inspiring way.
